

# ILS-1™ Holder System

*Dual interior springs*

Entegris' POCO Materials are specially engineered to meet the needs of the glass container industry. To meet the needs in hot glass handling applications, we have developed a new holder with an Interior Locking System (ILS) that significantly reduces foreign object debris. The unique design eliminates screws that can vibrate out or become damaged by the blow head, causing premature loss of inserts. The ILS-1™ holder has stainless steel spring clips that are secured between the insert and the inside of the holder and can withstand high temperature processes. The spring clips allow for an easy insert change and simple repair.

Our ILS-1 holder is made of stainless steel and has the option of a removable or fixed cover. It is adjustable to accommodate fixed or floating requirements and has self-aligning shoulders for easy, accurate placement.

This holder, paired with the superior strength and durability of our portfolio of GLASSMATE® graphite inserts, reduces mechanical damage and increases pack rates.

## FEATURES & BENEFITS

- Easy spring replacement
- Made from stainless steel
- Self-aligning shoulders
- Removable or fixed cover options
- High-temperature stainless steel springs
- Works with fixed or floating inserts
- Rectangle design
- Superior strength
- Fewer parts make repairs easy
- No screw, washer, ball, or loctite needed
- Increased holder and insert life
- Easy accurate alignment
